

Mental Math + Fun = Math Monkey

Math and Fun are two words that don't often find themselves in the same sentence but a new supplemental program in town is going to change all that. The Math Monkey Program uses an ancient math system to help kids and parents solve problems in Math, and have lots of fun in the process. With the incorporation of fun and games, it provides a fun and yet competitive environment for kids to learn the ancient wisdom of Vedic Math, a system designed to turn youngster's brain to high speed calculators.

"Children really shouldn't have to rely on a calculator or pencil and paper for something that the mind is quite capable of doing without them" quotes Professor Kenneth Williams, the Chief Academic Officer of Math Monkey. Professor Ken has been studying Vedic Math since 1971 and has dedicated his academic career to researching Vedic Math from ancient texts. The Vedic approach is a fresh way for children to learn and to master

Mathematics. "It just livens the mind" says Professor Ken.

Kids at Math Monkey are taught

Math monkey game based program is fun and attractive

much more than numbers. They develop problem solving, logic and memory skills on their way to become big thinkers of tomorrow. Math Monkey Kids enjoy going to their classes every week. With Vedic techniques that they learn in the classes such as magic of eleven, all from nine last from ten, by one more than the one before, Math Monkey kids find themselves becoming more creative, flexible and fast in solving mathematics problems. Above that, the weekly games that the kids play in class challenges them to succeed in Math and built their self confidence.

Classes at Math

Monkey are categorized into different levels. Children from age 5 - 12 are assessed based on their current math aptitude before placement in one of the levels. Math Monkey (M) Sdn Bhd has recently been awarded the winner of The 7th

Asia Pacific International Emerging Entrepreneur Excellence Awards 2008.

Math Monkey Knowledge Centres are currently located in Pulau Tikus, Penang and in Petaling Jaya, Selangor, with 3 branches opening soon in Bukit Mertajam, Bayan Baru and Taiping. Children are welcomed to join our classes for a free trial and assessments

before enrolling in the program. From July until September, the Math Monkey will be lighting the passion of students in math with our Summer Olympic Games 2008. Parents are encouraged to bring their kids for a full Math Monkey experience! For more information about Math Monkey program, please contact 04-227 9309/016-409 4039 (Penang & Bayan Baru), 016-419 9946 (Bukit Mertajam and Taiping) or visit our website at www.mathmonkeyasia.com.
