Math Monkey opens in Suwanee

March 20, 2007

Math Monkey Knowledge Center opened its first Atlanta location at 2615 Peachtree Parkway in Suwanee next to Super Target on Ga. 141 March 10.

Math Monkey teaches Vedic math, an Indian system that makes it possible to quickly solve complex math problems without a calculator or pencil and paper. The business uses interactive games to engage students and sharpen their skills.

Unlike most supplemental education programs, Math Monkey does not target remedial students. Its owners say it is ideal for children who are performing at grade level but want to advance their skills.

For more information, visit www.mathmonkey.com or call 1-877-GOT-MATH.
