

MATH MONKEY- A Revolutionary Mathematics Program

MATH MONKEY is a revolutionary academic enrichment program designed for kids to attain mathematics excellence. It's fun mathematics that offers a dynamic way for young people to embrace mathematics for a life time.

MATH MONKEY KNOWLEDGE CENTERS teach an educational program which is inspired by the wisdom of the East, weaved into the creativity of the West. Based on the Indian System called Vedic Math, which consists of 16 word formulas (Sutras), it allows one to perform calculations mentally, with great accuracy, simplicity and speed.

The MATH MONKEY CURRICULUM is the culmination of Professor Kenneth William's 36 years of research and teaching experience in the field of Vedic Maths. Widely regarded as the "guru" of Vedic Maths, Professor Williams believes that children shouldn't have to rely on a calculator or pencil and paper for something the mind is capable of doing without them.

Based on the philosophy that FUN is the key to learning, it gets children excited about numbers. Math Monkey is an age appropriate, game based curriculum of mental gymnastics. The focal point of the

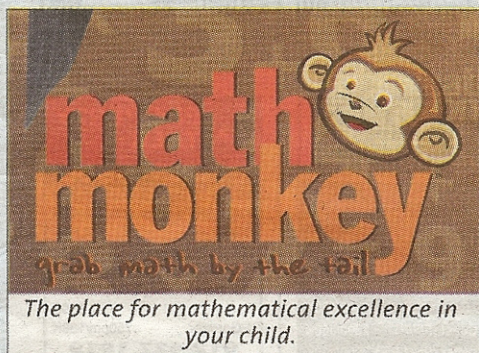

Math Monkey curriculum is on the process of doing mathematics. Weekly, Math Monkey students play games to solve mathematics problems which integrate the concept of Vedic Mathematics. They are encouraged to think on their toes in order to play the games. Through the games, the children's mathematic

children participating. The third component is the continued learning encouraged at home. Students receive a weekly assignment to be completed at home between classes. This allows practice between sessions, as well as provides the teacher with feedback on the student's retention and progress. Parental

encompasses algebra, square roots, cubes, calculus and geometry, which is a wider area than The Abacus, a tool used to perform calculations relating only to addition, subtraction, multiplication and division.

The mission of the Math Monkey Center is to transform the children of today into the thinkers of tomorrow. The program is suitable for children aged from 5 to 12. Math Monkey Knowledge Centers in Malaysia are opening in March in Penang and Petaling Jaya.

There would be FREE trial classes on 28th & 29th March '08, call for appointment 04-2279309/2281419/016-4094039 or e-mail her at Cheryl@mathmonkey.com for more information. To discuss a License Opportunity that adds up, call 04-2281416 or e-mail fhkhaye@gmail.com

skills, as well as their own mental agility improve.

There are three components to the Math Monkey program that create excited, engaged children, as well as disciplined minds capable of using mathematics as a second language, and applying that discipline to other academics. The first component and the guiding force in Math Monkey classes is the use of games. The second component is the honing of concentration and memory skills conducted primarily without the use of pencil and paper in order to build the mental math skills of the

involvement is encouraged through the At-home component, bringing another level of relevance to the child's experience.

Mental mathematics is far more systematic, simplified and unified than the conventional system. The Vedic formulas which can be easily memorized, provides children with a mental tool for calculation that encourages the development and use of intuition and innovation, giving children a lot of flexibility, fun and satisfaction. It dispenses with the need for repetition. In its totality, The Vedic formulas also
